

LG Water Solutions, a division of LG Chem Ltd. and the manufacturer of the full line of NanoH<sub>2</sub>O™ reverse osmosis membranes, introduces LG BW R Dura, a high durability BWRO membrane targeted for challenging water and wastewater applications with harsh chemical cleanings.

## Specifications

Product	Active area, ft <sup>2</sup> (m <sup>2</sup> )	Flow rate, gpd (m <sup>3</sup> /h)	NaCl rejection, %	Minimal NaCl rejection, %	Feed spacer, mil
LG BW 400 R Dura	400 (37)	10,500 (39.7)	99.6	99.5	34

## CIP Durability Benchmark Test

<sup>1)</sup> Stabilized for 24 hrs after start-up at standard test condition.  
<sup>2)</sup> 10 times for Company B.
